Education:

Bachelor of Science in Business Administration with minor in Computer Information Systems
Clearwater Christian College – Clearwater, FL.
May 2003

Licenses:

A+ Certified, HTML 4.0 Certified, DHTML Certified, PHP Certified

Professional Experience:

11/2008 to Current JP Morgan Chase & Co Tampa, FL

Senior Application Developer – Currently developing applications for state government projects using Java, Oracle and Flex on Weblogic Unix/Solaris environments. Responsible for entire development lifecycle, beginning with gathering and writing requirements documentation, determining LOE, writing program code, performing unit testing, facilitating UAT with onsite and offsite testing teams. Also responsible for a repeatable deployment process using ANT and Unix scripting to reliably deploy the application from development to production.

08/2006 to Current Freelance Consulting & Development Tampa, FL

Freelance Developer – Currently freelancing for local and national companies in need of expert development advice and website services. Using Linux, Apache, PHP and MySQL to create scalable websites for these corporations: the largest MySQL database we have is over 1,200 tables. Other services include website migration: moving multiple gigs of data from old servers to new, backing up and recreating MySQL databases, unit testing new website functionality and troubleshooting file system permissions issues.

05/2004 to 11/2008 PriceWaterhouseCoopers Tampa, FL

Senior Developer – Designed and developed internal business application systems using classic ASP and Oracle then .Net and Oracle on Solaris environments. Responsibilities included: designing, programming, unit testing, facilitating entire UAT testing sessions, taught formal training courses to leadership, management and colleagues, and supported the production application. Also managed a team of 12 Crystal Reports / Business Objects developers to provide mission critical data to Risk Management teams.

05/2002 to 05/2004 Sealund & Associates Clearwater, FL

Graphic Artist, Programmer, Content Developer, Instructional Designer - Successfully managed and worked under a time intensive, detailed schedule to develop Web-Based Training programs and create instructor-led training manuals using HTML, JavaScript, Photoshop and Flash for Fortune 500 software applications. Manager for University of South Florida senior project spring and fall semesters. Implemented Section 508 compliance of the Americans with Disabilities Act on select projects for clients. Implemented AICC Compliance standard procedures.

04/2001 to 09/2001 Richland Towers, Inc. Tampa, FL

Desktop Support Technician, IT Manager - Hired in a desktop support position, performed as acting IT Manager for three months in the absence of previous manager. Responsible for company email reliability, print services, file sharing/serving, remote access support. Implemented wireless networking, VPN access, network expansion using fiber optics. Also designed several intranet websites for internal employees using ASP and MS Access.

08/2000 to 04/2001 Clearwater Christian College Clearwater, FL

College Website Consultant – Worked with public relations department to initiate a complete website reconstruction project. Instrumental in the implementation of new website technologies. Created on-campus bulletin board website for student use using PHP, Apache and MySQL. Created personal websites for several college professors using PHP and custom bulletin board software written by hand.

11/1997 to 05/2000 Moore Solutions, Inc. Port St. Lucie, FL

Web Developer - Worked in a web design team to design, implement, test, and release e-commerce websites; used CGI/Perl before converting all new products to PHP. Flat file databases were used with Perl and MySQL was used on PHP sites. Also worked with ASP and MS Access. Wrote HTML without the aid of any software programs.
